

World Energy Consumption

Hover label shows various stats when country is hovered on.

Canada
- stats
- stats
- stats

Dropdown menu to select energy type. Changing this will change main chart colour.

Renewables

Global toggle to switch all values between absolute or per-capita.

Show per-capita values

Top 10 Countries

Canada (99%)

Australia (94%)

United States

China

France

United Kingdom

Russia

Brazil

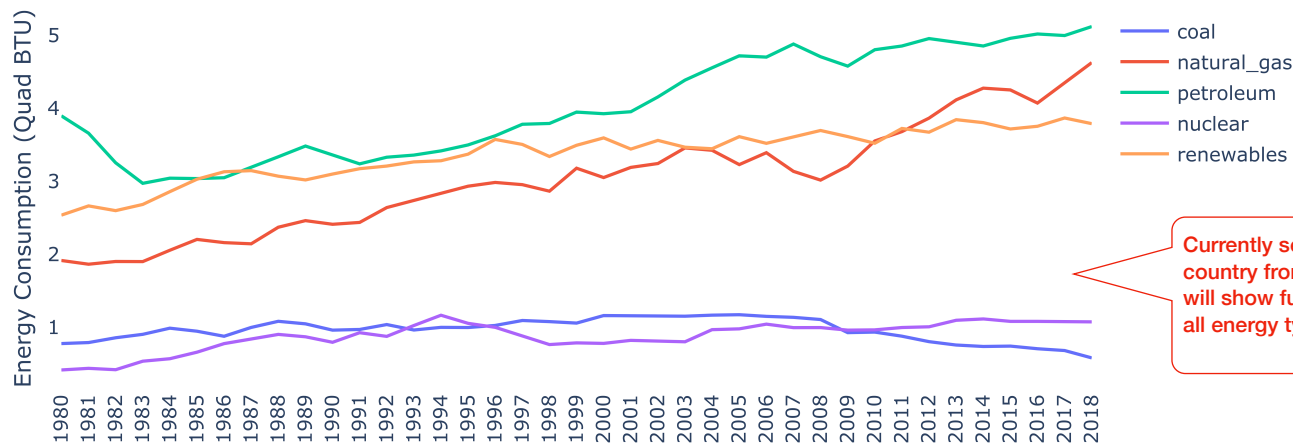

Mexico

List of top 10 countries based on current currently selected energy type. (This will actually be a bar chart for easier visual comparison).

Year Slider
Moving slider through the years will cause main chart countries' brightness/opacity to change based on currently selected energy type's percentage of its total.

1980 <-- Year Slider --> 2018

Energy Consumption (Canada)

Currently selected country from main chart will show full history for all energy types

Extra space for more info/stats about data
